By : Ralph Tietjen

Property Overview

The Travelodge Parksville Hotel has 82 rooms split between three floors which are all served by elevator. The public areas of the property are fully accessible including the Pool / Hot Tub area. Entry into the pool or hot tub is with steps and accompanying railings for stability. There is one designated wheelchair parking space with plenty of on-site parking.

Accommodations

The Travelodge Parksville offers one accessible room (#118) on the ground floor which at the time of viewing was under renovation. The entry door has 33" (83cm) width making for easy access in a wheelchair. The king bed is accessible from both sides with plenty of maneuvering room for a wheelchair. There is a connecting door to the adjoining room (#120) with 31" (78cm) width.

The washroom is accessible with a 35" (88cm) wide threshold and good access to the sink and toilet. There are large grab bars on both sides of the toilet which can be moved/adjusted as desired. There is a full roll-in shower with an overhead showerhead and grab bars on each wall. There is currently no handheld showerhead installed – something which is recommended. A shower stool is provided.
